MEDITECH Patient Care System (PCS) Implementation

GRA was hired for the implementation of inpatient online documentation in MEDITECH Client Server Patient Care System (PCS) for all nursing and on-nursing staff. GRA is currently working on the implementation of MEDITECH Client Server 5.6. GRA played a pivotal role in optimizing the design and functionality of the online documentation and coordinated the menus and reports review in preparation for the upgrade to 5.6. GRA successfully implemented online documentation on time and on budget for all inpatient staff. This included the development of a detailed staff intranet user guide, as well as pocket guides and tip sheets. GRA developed and assisted in training all staff, as well as conducted ongoing meetings with user groups requesting changes to be made to improve documentation of care.
